## 37 **1 General information on examples**

38 This document presents some examples of Order-x, which are displayed in BASIC and COMFORT Profiles. In  
39 BASIC profile, depending on the examples, some information present in the PDF presentation may not be  
40 present in attached XML (which contains only BASIC profile data).

41 For all example, the PDF presentation is done with the first page with Document level information, and the  
42 following pages for lines.

43 Each line is composed with 1 principal line for main information and 3 complementary lines for additional  
44 information. The first line contains:

- 45 • #line (always line 1, 2, 3, ...) and Order Line Identifier (which can differ from #line if the Order is  
46 the result of a previous process which has deleted some lines)
- 47 • Product IDs
- 48 • Product description
- 49 • Gross Unit Price
- 50 • Discount or Charge on Unit Price: charge is present to handle for instance some tax to be applied,  
51 especially the WEEE Tax
- 52 • Price Base quantity
- 53 • Net Unit Price = Gross Unit Price – Discount + Charge
- 54 • Quantities: Requested and Agreed (for Order Response only)
- 55 • Quantity Unit
- 56 • Line Allowances and Charges
- 57 • Line Total without VAT = Requested (or Agreed if present) quantity \* Net Unit Price / Price Base  
58 Quantity + Line Charges – Line Allowances
- 59 • VAT rate

## 60 **2 List of examples**

### 61 **2.1 ORDER-X\_EX01\_ORDER\_FULL\_DATA**

62 This example contains most of business term present in Comfort profile for an ORDER. It contains 3 lines,  
63 referred as line 1, 3 and 4 (for instance following a Purchase Request which has deleted line 2 on the approval  
64 process). It has allowances and charges on document level and line on each line level. It is for a delivery (not  
65 pick-up). It refers to a Blanket Order with ID "BLANKET\_ORDER\_ID" given on page 1 (document level), and  
66 blanket order line ID given on line level.

67 It shows 2 ways of managing WEEE tax on line 1:

- 68 • With a charge on Gross Unit Price = 0,50 and a Reason on Gross Price Reason box, available on  
69 COMFORT and EXTENDED profiles.
- 70 • As a note: Code TXD, Content = "WEEE Tax of 0,50 euros per item included", more dedicated to  
71 BASIC profile which only has Net Unit Price.

### 72 **2.2 ORDER-X\_EX02\_CHANGE**

73 This example is an ORDER CHANGE as a TEST file, with a Document Status = 38 = Final.

74 It refers to PO123456789 and has the ID PO123456789-C02. It is for pick-up. It refers to a Blanket Order. It is  
75 similar to example 1, with 3 lines changed (from Delivery to Pick-up).

76           **2.3 ORDER-X\_EX03\_ORDER\_BASIC\_DATA**

77      This example is similar to example 1, but with only business information from BASIC Profile (on PDF and XML).

78           **2.4 ORDER-X\_EX04\_RESPONSE**

79      This example is an ORDER RESPONSE to an ORDER similar to example 1 (without WEE Tax), with a switch to  
80      Pick-up mode and a proposition for a product substitution for line 2:

- 81           • First with a line 2 of Order Response with a Line Status “NOT ACCEPTED” and Agreed quantity  
82           equal to 0
- 83           • Then with a new line (line 3 of the Order Response referring also to line 2 of initial ORDER), with a  
84           substituted product, and a line status = “ADDED”, Requested quality = 0 and Agreed quantity =  
85           10

86      Line 4 of the Order Response is accepting without amendment line 3 of the ORDER.

87           **2.5 ORDER-X\_EX05\_RESPONSE\_BASICDATA**

88      This example is similar to example 4, with only Basic profile data in PDF and XML.

89           **2.6 ORDER-X\_EX06\_RESPONSE\_OK**

90      This example is an ORDER RESPONSE accepting without amendment the ORDER. No lines. Only a Document  
91      Status = 1 meaning “ACCEPTED”

92           **2.7 ORDER-X\_EX07\_ORDER\_DELIVERED**

93      This example is an ORDER, to be delivered.

94           **2.8 ORDER-X\_EX08\_RESPONSE\_A&R\_NO\_CHANGE**

95      This example is an Order Response with a first line Not Accepted, a second line Accepted with amendment  
96      (agreed quality = 4 instead of 5), and line 3 accepted.

97           **2.9 ORDER-X\_EX09\_RESPONSE\_MULTIPLE\_DEL**

98      This example is an ORDER RESPONSE with multiple and partial delivery proposed on 2 different lines.

99           **2.10 ORDER-X\_EX10\_RESPONSE\_ADDED\_SUBSTITUTED**

100     This example is an Order Response with a substituted product, like example 4.

101           **2.11 ORDER-X\_EX11\_ORDER\_PICK-UP**

102     This example is an ORDER with Pick-up mode.

103           **2.12 ORDER-X\_EX12\_RESPONSE\_NOK**

104     This example is an ORDER RESPONSE REJECTING the ORDER. No lines. Only a Document Status = 8 meaning  
105     “REJECTED”.
